

Timecrack: The first book in the gripping sci-fi/fantasy series, the Timecrack Adventures

From: williamlongbooks@gmail.com

The first book in the Timecrack series, by author William Long, is an adventure story about two young brothers, who find themselves on a journey to a strange and dangerous new world to find their parents, now missing in Mexico's Yucatan jungle.

Archie and Richard are the sons of Malcolm Kinross, an archaeologist, and his wife Lucy, famous for their years of digging, despite the risks of working through the Yucatan's hurricane season. They have discovered an ancient pyramid and temple, but unknown to anyone, they have been transported through time and space to another world by a timecrack.

*The young brothers pay a visit with Marjorie, their school tutor, to the nuclear research **Facility**. It's also known as the **DONUT** by the scientists, under the control of their uncle, Professor John Strawbridge. During their visit they are unexpectedly swept up by a frightening, thunder-like, blue cloud. The blinding, yellow core of a timecrack had arrived. It would deliver all of them to a world where Malcolm and Lucy Kinross might be found.*

Fast-paced, richly detailed, and well-developed, this thrilling story will be loved by readers of all ages, a book that transcends genre and age.

Richard and Archie are two very likable characters. They are smart, responsible, and surprisingly calm given the condition they find themselves in. The addition of their uncle and tutor adds another level to a fascinating story. However, its Richard's unique ability to see into the minds of friends and strangers, that helps them face the dangers they all face.

William Long's *Timecrack* is a good old-fashioned science fiction romp in the true spirit of the father of the genre, H.G. Wells. This dizzying Boy's-Own escapade through the wormholes of time and space will have you gripped right to the last with its fantastical vistas of new exotic worlds and ancient civilizations. **M. McCullough Daily Mirror**

A rollercoaster Sci-fi adventure that flings the reader headlong into other worlds that are even more unnerving because they blend the fantastic with the familiar. You catch yourself thinking: somewhere in our past or our future this might be happening. A novel that awakens the young-adventurer in all of us. **Karen Maitland Bestselling Author**

I managed to pick up a copy of the first *Timecrack Adventure*. I have not read sci-fi since I was a young man and must say the first 60 pages have proved intriguing. My wife has complained because the bedside light is staying on through the night, until I finish the story.
